

Florida Custom Elements Samples

There have been two sample files provided. One demographic file that covers all the demographic elements and an events file with 4 PCRs that covers all the event custom elements. The purpose of the files is to show how the custom elements are used within a NEMSIS v3 compliant file. The elements are specified according to the NEMSIS v3 Data Dictionary and is also listed in the Florida v3 Data Dictionary. Please refer to the data dictionary for the details of the elements.

Demographic Custom Elements

There are 3 Demographic Custom elements. The Florida specification for the custom elements can be found in the Florida Data Dictionary v3 and in the dCustomConfiguration.CustomGroup section of a XML NEMSIS Compliant file. The results of the custom elements can be found in the dResultsGroup of the NEMSIS v3 XML Compliant file.

Community Paramedic Elements

- cdcpAverageBilled – Average Community Paramedic Visit Billed
- cdcpAverageCost – Average Community Paramedic Visit Cost
- cdcpProtocols – Extended EMS Agency Protocols

EMS Event Custom Elements

There are 5 categories of EMS Event Custom Elements with a total of 20 custom elements. The Florida specification for the custom elements can be found in the Florida Data Dictionary v3 and in the eCustomConfiguration.CustomGroup section of a XML NEMSIS Compliant file. The results can be found in the eResultsGroup of the NEMSIS v3 XML Compliant file.
