Performance Measures 2013

Timeliness of Submission

Performance Measures

- **Maintain National Compliance**
 - Still # 1
- **Transition to V3 – A 2 step process**
 - Transition to new state software - **in Production**, agency transitions began July 7th.
 - Transition to NEMESIS V3 data standard – work in progress

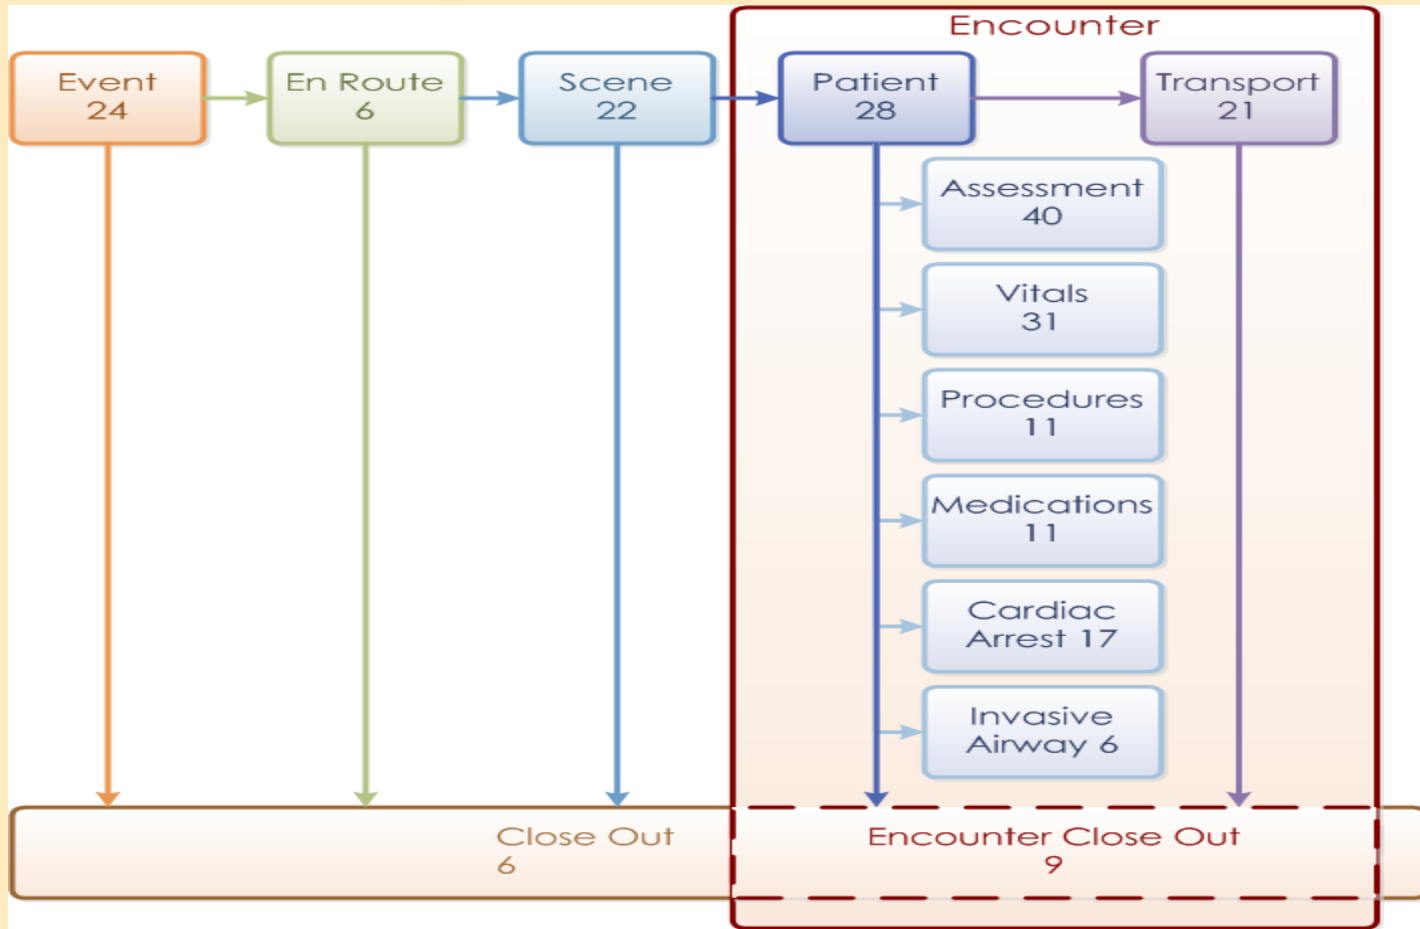

The Florida V3 Data Standard

- Review the V3 EMS Event Flow Schematic
- Review the logic
- Review the each section of the schematic
- Questions
- Conclusion

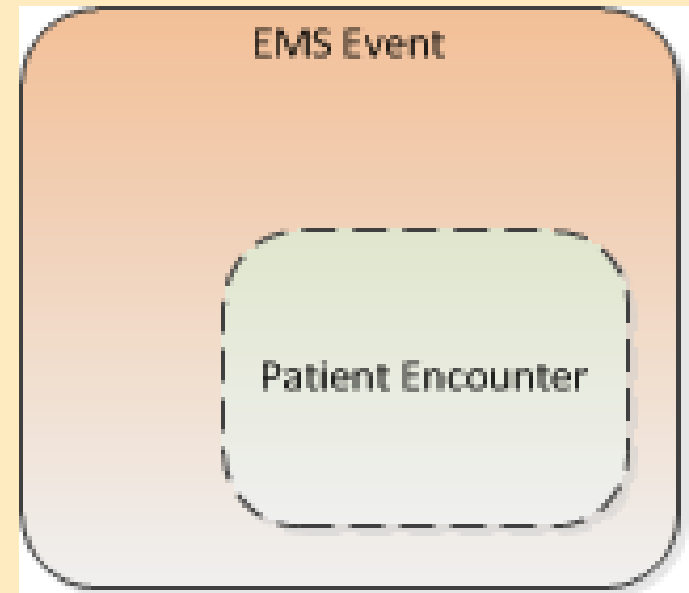

EMS Event Flow Schematic

EMS Event

- EMS Event: Any time that an emergency medical services are requested and personnel are dispatched to respond.
- Patient Encounter: Any time that subjective and/or objective signs and/or symptoms or a patient complaint results in evaluation and/or treatment.
- Every call is an EMS Event that may or may not have a patient encounter.

Event Section

- One of three sections required for all EMS Events
- Contains many of the core elements that make up an EMS Incident prior to the Unit going En Route.
- Has 13 Mandatory elements
- Next section: En Route Section

En Route Section

- Second of three section required for all EMS Events
- Has all the elements that describe the unit going En Route
- 1 Mandatory Element
- Next Section: Scene Section
- If the unit is cancelled prior to scene, then remain proceed to the Close Out Section

Scene Section

- These elements capture information about the scene of the EMS Event.
- Does not have any Mandatory Elements
- Business rules will determine what elements must be filled out.
 - For example if the unit arrived on scene date time is entered, then there should be a unit left scene date time entered also.
- Next Section: Patient
- If the call is cancelled prior to patient contact, then proceed to the Close Out Section

Patient Encounter

- The patient encounter has all the sections within an EMS Event that capture information about the interaction between EMS Personnel and the Patient.
- Patient, Assessment, Vitals, Procedures, Medications, Cardiac Arrest, Invasive Airway, Transport, and Encounter Close Out.
- The sections can be completed any order or concurrently.

Patient Section

- The Patient Section covers all the elements that describe the patient.
- This section is only filled out if there is patient contact.
- Most elements are Patient Demographic elements
- Next Section: Assessment

Assessment Section

- The assessment section has the most elements of any section.
- All the elements in this section depend on the situation on hand.
- It includes assessing the patient and encounter
- It includes the Alerts section as well.
- Next Section: Vitals

Vitals Section

- Vitals Sections includes all the elements regarding capturing patient vitals.
- The elements completed depend on what is done to the patient.
- Next Section: Procedures

Procedures Section

- This section records information about the procedures performed on the patient.
- Next Section: Medications

Medications Section

- This section captures information about the medications administered to a patient.
- Next Section: Cardiac Arrest

Cardiac Arrest Section

- This section captures information about a patient's cardiac arrest.
- If a patient has a cardiac arrest, this section is filled out, otherwise it can be skipped.
- Next Section: Invasive Air Way

Invasive Airway Section

- This section captures additional information about an Invasive Airway procedure performed on a patient.
- Next Section: Transport Section

Transport Section

- This section refers to the elements that describe the transport of a patient and the destination.
- This section is only required if the transport unit actually transports the patient.
- Non-Transport unit will never fill this out.
- Next Section: Close out

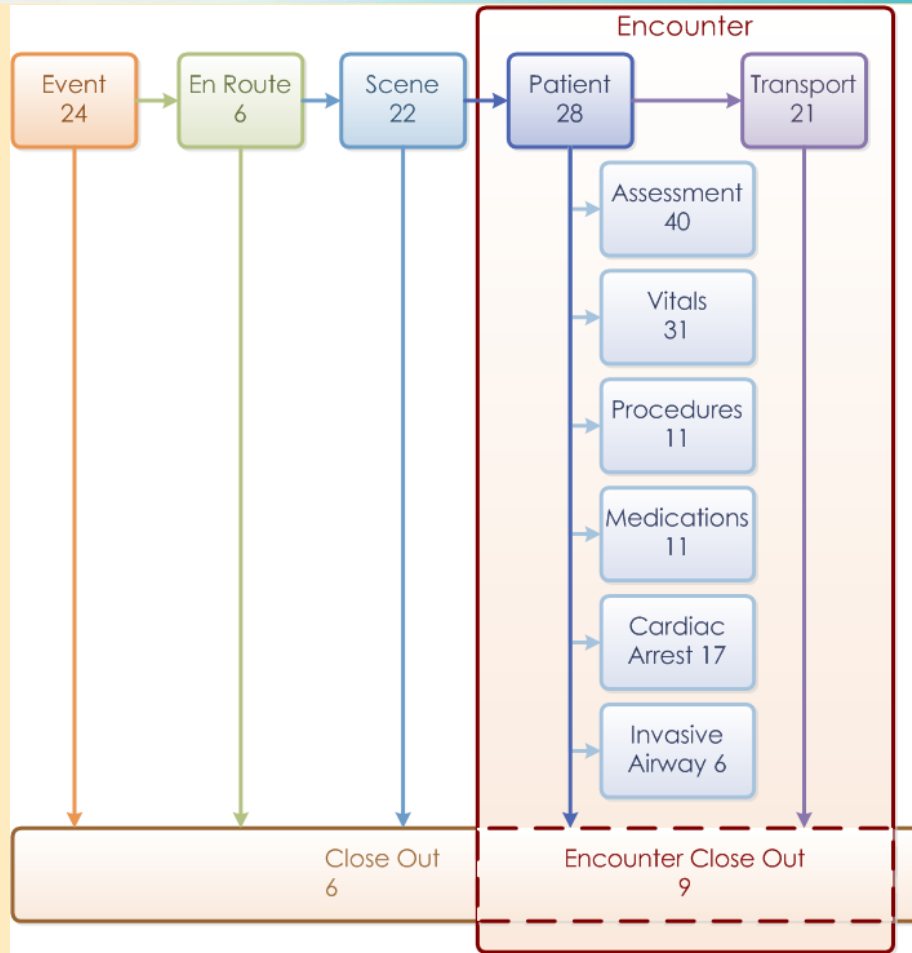

Close Out Section

- This section covers closing out of the record.
- Third Section required in every EMS Event.
- 2 Mandatory elements.
- The patient encounter close out elements are included in the incident close out section.
- No more sections.

Questions

V3 Format Conclusion

- The EMS Event was broken down into sections that flowed from the time the incident is initiated until it is closed out
- Elements were grouped into those sections
- The situation at hand determines which sections need to be filled out.
- Business rules were developed with this flow in mind.

New System Transition

- Why the need to transition?
- What does that really mean to you?
 - How does it really impact my day to day operations?
 - How will I get prepared
- What's in it for my agency?

Transition to New State System

Current System

Future Agency
submissions DD 3

EMSTARS-CDX

“Potential Differences to you”

You will have more control over your agency administration, user setup and reporting. Improved submission, tracking, communications and reporting capabilities.

- **User Setup & Admin**
- **Submission Handling**
- **Agency communications**
- **Validation (scoring)**
- **Reporting**

EMSTARS-CDX Transition

Agency Migration

- Migration Schedule Maintained
- Communicate with agency – webinars and trainings
 - **Provide agency training window/Train agency**
- Configure agency in EMSTARS CDX
- Deactivate in EMSTARS 1.4
- Perform agency migration of historical data to new vendor system
- Validate migration #'s
- Submit thru the new system
 - DOH will Monitor agency submission
- Validate Vendor Update to Data Warehouse

DOT Grant Proposals

- **DOT 405 Grant Proposals**
 - Web based data entry capability
 - Agency Subgrants - \$200,000

Open Discussion
